PERSONAL PROJECTS

CraveExpress (01/2024 - 02/2024)

- Developed Crave Express, a food delivery platform, utilizing the Swiggy API for real-time data on menus, restaurant availability, and delivery options.
- Implemented a responsive UI with Tailwind CSS and Redux Toolkit for seamless user interactions, including add-to-cart functionality for an enhanced shopping experience.
- Integrated a Higher Order Component to display sponsored content, providing users with relevant and curated suggestions.

MeTube (04/2024 - 05/2024)

- Developed MeTube, a YouTube-inspired platform using React and Firebase, supporting real-time data synchronization and secure user authentication for a smooth video experience.
- Designed a user-friendly interface with Tailwind CSS, featuring infinite scroll for continuous content loading and Higher Order Components to showcase sponsored videos.
- Enhanced platform interactivity with advanced features, including video search functionality and live chat, boosting user engagement and retention.

flixFlix (04/2024 - 05/2024)

- Built FlixFlix, a Netflix-style platform using ReactJS, integrating a ChatGPT-powered search feature that suggests movies based on user input for a highly personalized browsing experience.
- Used the TMDB API to provide extensive movie browsing options, enabling users to explore a wide variety of titles with ease.
- Implemented Firebase authentication for secure user access and styled the interface with Tailwind CSS, ensuring a sleek, responsive design.
